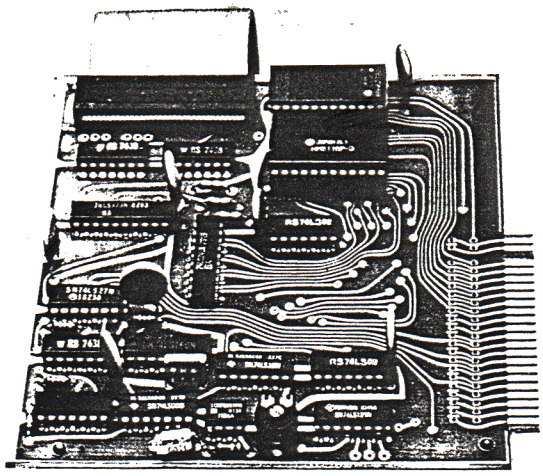
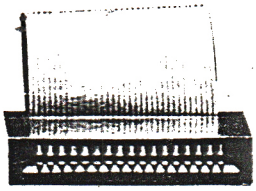
PERIPHERALS INFORMATION SHEET

Floppy Disc Interface

TS-1000/ZX-81





$149 COMPLETE

$119 KIT

The floppy disk frees the ZX-81/TS-1000 user from the tyranny of the awful cassette data and program storage system. Reliable and fast loading, now the Sinclair computer can be used for serious applications.

Available exclusively from CENTRONIC INC., the FIZ Floppy Disk Interface allows the ZX-81/TS-1000 to use the popular Shugart SA-400 floppy disk drive (please specify 35 or 40 track when ordering).

The FIZ will DSAVE and DLOAD BASIC programs as well as DATA files using the CREATE, READ, and WRITE routines. Functions are also available to KILL files, read the disk DIRectory, INITialize and clear a NEWDisk. All functions may be called by name in the immediate mode or from within a program.

COMMANDS

* DSAVE - Save a BASIC program currently in memory.
* DLOAD - Load a BASIC program into memory.
* CREATE - Create a data file for writing.
* WRITE - Write to a data file.
* READ - Read a data file.
* INIT - Initialize system
* NEWD - Erase and name a disk.
* DIR - List name of disk and all programs and files on the disc.
* KILL - Remove program from directory and free space.
* STAT - List disk or file status.

SYSTEM REQUIREMENTS

* ZX-81 or TS-1000 NO extra memory is required, but all known RAM packs are supported.
* Expansion bus or pass through connector for computer peripheral connection is needed (available as an option).
* SA-400 floppy disc drive (or equivalent) and power supply (35 or 40 track - specify when ordering). A conversion from 35 to 40 or 40 to 35 can be provided by exchanging RAM's for a nominal charge. Please contact CENTRONIC INC. for details.
* The interface is powered by the computer.

SPECIFICATIONS

* Speed - Loads an 8K program in 10 seconds.
* Disk storage is organized as 34 (39) data tracks of 10 (hard) sectors per track, each with 128 bytes of storage. Track 0 is used for the directory.
